Shahrzad Amirrahimi

Content Writer

Iran

Summary

I have been working in the field of producing textual content and SEO since 2015.

I'm still working in the field of content creation and have my youtube channel which I create videos about things that I'm interested in, including anime and manga.

since 2019 I have started to learn Front-End. I'm very comfortable in HTML and CSS and designing the basic looks for websites. but JS is not my strong point. but I'm working on it and learning more about it. at the same time, I started to learn Python. I made few videos about it back in days but went back to learn Front-End again.

I'm working on my Japanese language and also learning German. I'm not fluent in English but the test I had before shows that I'm at an intermediate level.

part of my job as a content creator is to be able to read English texts and translate them to Persian. I also worked as a translator for Movies and dramas for 6 months.
